-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 02 February 2005.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Election/Restrictions

1. Amended claims 21 and 23 are directed to an invention that is independent or distinct from the invention originally claimed for the following reasons: Independent claim 21 has been amended to include the structural element of an overlay which is drawn to a nonelected species.

Since applicant has received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for prosecution on the merits. Accordingly, claims 21 and 23 are withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP § 821.03.

Claim Objections

2. Claims 47 and 51 are objected to because of the following informalities: In line 2 of claims 47 and 51: The term --to-- should be inserted after the term “coupled”. Appropriate correction is required.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Art Unit: 3673

4. Claims 14-19 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Pennington et al. '078 (note especially Figures 29-32; column 2, lines 6-14; column 13, lines 43-67; and column 14, lines 1-40).

5. Claims 25-27 and 41 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by U.S. Patent No. 5,377,370 to Foster et al. (note especially Figures 1-4; column 1, lines 18-49; column 2, lines 10-28; column 3, lines 15-68; and column 4, lines 1-24).

6. Claims 33, 35, 36, 38 and 42-44 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Adams '065 (note especially Figures 3, 4 & 6-9; column 2, lines 30-38; column 5, lines 44-67; and column 6, lines 1-21).

Claim Rejections - 35 USC § 103

7. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

8. Claim 32 is rejected under 35 U.S.C. 103(a) as being unpatentable over Foster et al. '370. Foster et al. do not specifically disclose a condition wherein the mattress includes a plurality of mattress sections. It would have been obvious at the time the invention was made to form the mattress of Foster et al. '370 as a plurality of mattress sections, since it has been held that

Art Unit: 3673

constructing a formerly integral structure in various elements involves only routine skill in the art. *Nerwin v. Erlichman*, 168 USPQ 177, 179.

Response to Amendment

In response to Applicants' arguments on pages 9 and 10 of their amendment concerning claim 25, the examiner respectfully maintains that Foster et al. still disclose the use of a mattress section (26) combined with a patient support (10), wherein the width dimension of the mattress is greater than the width dimension of the top surface of the apparatus frame (elements 34 and the portion of element 18 disposed between elements 34 as shown in Figure 1) as claimed. Claims in a pending application should be given their broadest reasonable interpretation. *In re Pearson*, 181 USPQ 641 (CCPA 1974). Furthermore, Applicants' arguments on pages 10, 11, 13 and 14 of their amendment with respect to claims 21 and 23 have been considered but are moot since these claims have been withdrawn from consideration.

In response to Applicants' arguments on pages 11 and 12 of their amendment concerning claim 33, the examiner respectfully maintains that Adams still discloses the use of a retainer (82) having first and second members (as shown in Figure 7) configured to engage first and second accessory rails (80, also as described in column 6, lines 1-4 & 8-12) to maintain a width extender (76-79) in a desired position on the frame (1) as claimed. Claims in a pending application should be given their broadest reasonable interpretation. *In re Pearson*, 181 USPQ 641 (CCPA 1974). Lastly, in response to Applicants' arguments on page 12 of their amendment regarding claim 14, the examiner respectfully disagrees and maintains that Pennington et al. still disclose the use of a

Art Unit: 3673

patient support surface (138, 140, 142) which is inherently removable and storable as claimed (please also note Figures 15-18; column 9, lines 29-33 and column 10, lines 18-39).

Allowable Subject Matter

9. Claims 45, 46, 48-50 and 52 are allowed.
10. Claims 47 and 51 are objected to but would be allowable if rewritten to overcome fully the minor informalities noted above and in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

11. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Malcolm '295.

12. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event,

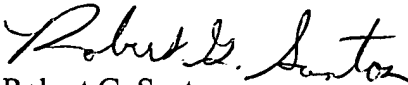

Art Unit: 3673

however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
